# Warehouse & Logistics Services

With our tank storage located in Turkey and our vessel chartering services, we offer our clients logistics and transportation for large quantities of petroleum products supplied worldwide.

We give bonded-warehouse service storage for more than 30.000 metric tons of polymer materials per month in various cities in Turkey and free zones in Europe. A bonded warehouse is a secure storage space where no import taxes are due as long as the items are stored.

## Natural, Environmentally Friendly Products and Services

While developing our products and services, to ensure that they are environmentally friendly and of high quality.

We focus on zero waste and supporting sustainability by working in harmony with our stakeholders to leave a better world for our future generations, being aware of the limited nature of natural resources, and adopting environmentalist approaches for today and for the future.

In this regard, we are cooperating with are partners all around the world to supply them with the recycled polymers and environmental friendly raw materials for their manufacturing operations.
